**What is it ?**

# AirTight™ OC

## Open-Cell Spray Insulation

ICC ESR-2847

### Product Use and Design

**AirTight™ OC** is an **Open-Cell** spray applied foam, which when installed following application guidelines, adheres tenaciously to framing members and substrates. **AirTight™ OC** provides superior energy economy and durability while significantly reducing unmanaged moisture and air infiltration.

**AirTight™ OC** forms a completely sealed air barrier in wall cavities and can be used to fill 2" x 6" stud wall construction in a single application. Its performance is superior to commonly used fiber-glass batt or blown-in insulation. It adheres well to most building materials and will provide a continuous barrier against air infiltration for the life of the building. As a component of a "systems" approach to proper building envelope construction in both residential and commercial construction.

**AirTight™ OC** provides exceptional performance in reducing heat transfer.

### TYPE : I, II, III, IV, V (A&B) Construction Recommended Product Applications

- Walls
- Attics
- Floors
- Crawl Spaces
- Ceilings
- Vaulted or Cathedral Ceilings

# AirTight™ CC

## Closed-Cell Spray Insulation

ICC ESR-2847

### Product Design

**AirTight™ CC** is a **Closed-Cell** spray applied foam, which was developed using an EPA approved next generation blowing agent which when installed following application guidelines adheres tenaciously to framing members and substrates.

**AirTight™ CC Closed-Cell** spray foam provides superior energy economy and durability while significantly reducing unmanaged moisture and air infiltration.

**Product Use** As a component of a "systems approach" to proper building envelope construction.

**AirTight™ CC Closed-Cell** spray foam provides exceptional performance in minimizing heat transfer, moisture gain, air leakage, and improving racking strength.

The logo for LAPOLLA is a dark blue oval with a silver, metallic-looking border. The word "LAPOLLA" is written in white, bold, uppercase letters across the center of the oval.

**LAPOLLA**

**How is it fitted ?**

**Lapolla Spray Foam Insulation must be installed by licensed and trained installers. To achieve accreditation the installer must complete an intensive training course which consists of product knowledge, roof surveys, installation process, health and safety, customer care and a Police CBA check.**

### **THE PROCESS**

**Whilst the material reaches optimum spraying temperature in the fitters rig outside the property a single hose pip and spray gun is brought into your home. Dust sheets will be already laid appropriately to minimise mess. Once at optimum temperature the trained installer will proceed to spray or inject the spray foam depending on application type. Once this single application is complete our team will be careful to tidy and Hoover any areas used, leaving your home as they found it.**

**When do I need it ?**

# Coldest winter for 50 YEARS set to bring MONTHS of heavy snow to UK

BRITAIN is facing the most savage winter in more than 50 years with months of heavy snowfall and bitter Arctic winds set to bring the country to a total standstill.

Gas and electricity prices are rising at up to eight times higher than increases in average weekly earnings, according to findings by Citizens Advice.

The charity projects that by January 2014, the big six suppliers will have raised their prices by a total of 37% since October 2010. Gas and electricity prices have gone up at three times the rate of inflation - which has risen by 10.2% since October last year - according to the findings. Jamie Doward writes:

"Citizens Advice says it has grave concerns about the impact that energy price rises are having on people's ability to maintain a de-cent standard of living.

It says it "often sees" clients in financial despair and warns that a growing number of parents are facing tough choices between putting the heating on, clothing their children and feeding the family.

The logo for LAPOLLA is a dark blue oval with a silver, metallic-looking border. The word "LAPOLLA" is written in white, bold, uppercase letters across the center of the oval.

**LAPOLLA**

**Why do I need it ?**

# KEY **BENEFITS** FOR SPRAY FOAM INSULATION

Can **reduce** your utility bills by up to **45%**

**Seals** your home from **moisture** and **air intrusion**

**Protects** your **families health** from **dangerous mould** and **airborne pollutants** and **allergens**

Can **strengthen** your home

Finally this spray foam can reduce **your homes carbon footprint,**  
allowing you too literally

**Live Green. Every Day**

# Perfect for the following;

Using a specialised card system this insulation can be applied to **THATCHED COTTAGES**, the underside of **STATIC/MOBILE HOMES**, and **LISTED BUILDINGS** that have **SLATE/RAG SLATE** roofing materials.

Can be sprayed/injected blind into **SMALL PROBLEM ROOF SPACES**, left behind when a **LOFT HAS BEEN CONVERTED**, or in **HISTORIC BUILDINGS**.

Spray foam increase your homes **EPC** thus meaning a more efficient, saving money on your **UTILITIES**, adding **VALUE** to your property.
